Decotone Surfaces Interior Grade Compact Laminate is a material that is manufactured from 3mm (1/8") thickness up to 25mm (1") thickness. The surface can be produced in a wide range of solid colors, woodgrains, patterns and pearlescent designs. Compact Laminate has a high resistance to impact, scratching, fire, water and humidity due to its high density composition. Decotone Surfaces Interior Grade Compact Laminates can be used in hospitals, schools, restaurants, locker rooms and various types of partitions. Due to it's non-porous material, it is resistant to bacteria and easy to clean.
